PERSONAL PROJECTS

Bug Bounty (08/2020 - 10/2020)

- Worked as freelancer in bug bounty for TCS. There were some security bugs in them through which any one access to there confidential information. So my work was to find that security bugs and resolve them. This all was done by using Python with machine learning and Data science

Impact of Covid-19 on Awareness of Personality Disorder and Depression (09/2022 - 10/2022)

- To analyze the correlation between the personality disorder/mental distress and covid-19. Plotting nation level distress frequency at different time intervals will show increase in frequency at the time of distress. Using seaborn lib as mentioned in the requirement doc.

Fake News Detection with Machine Learning, using Python (08/2022 - 09/2022)

- There was a csv file that contains a lot of news having label fake or real we have to check whether the information provided is true and by how much accuracy percentage and also show the percentage of real or fake using graph.

ACHIEVEMENTS

I have done a little task of finding the security bugs on the site of TCS. (08/2020 - 10/2020)

Finding security bugs and resolve them

SKILLS

HTML

CSS
